Rearview of XTOP

Sideview of XTOP w. standard front

Optional lockable front storage box

Storage box combined with XTOP

XTOP allows easy access for loading / unloading cargo

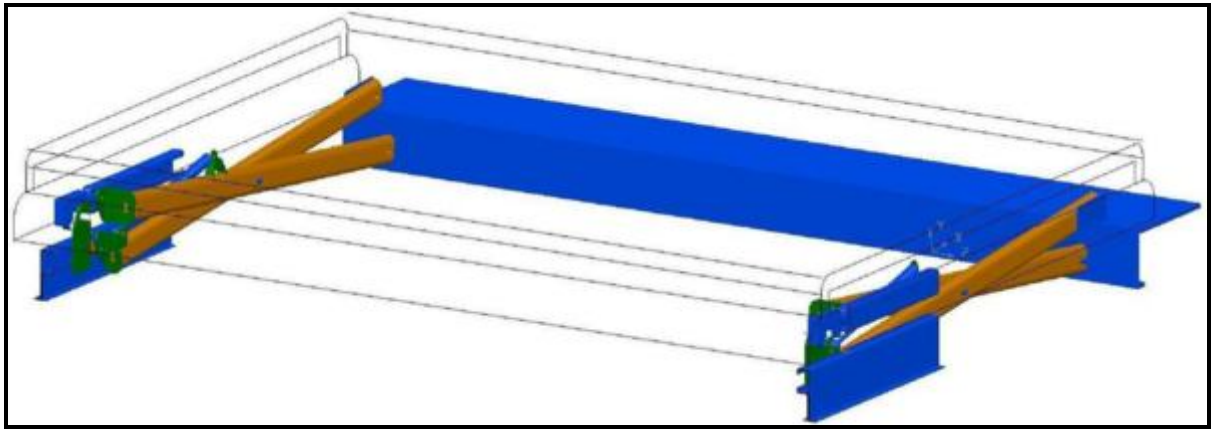

Sturdy construction allows XTOP to be used even as a work-platform

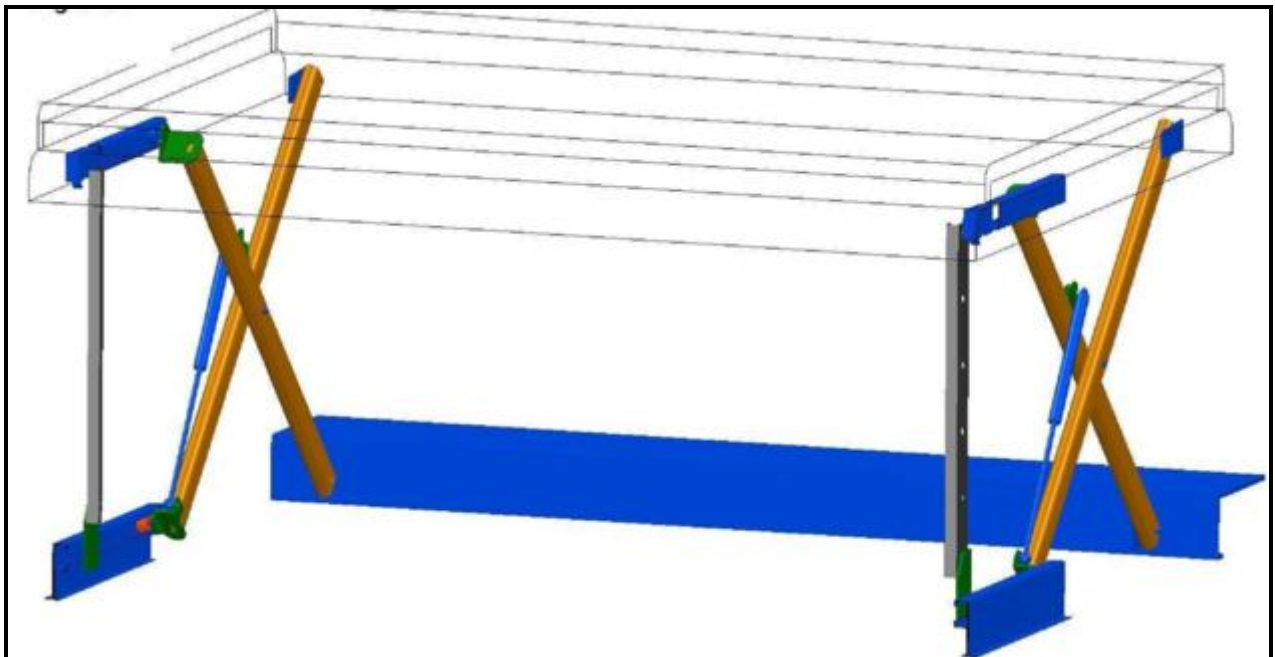

Exclusively produced aluminum profiles are used for XTOP Notice the 'top rail' for securing cargo.

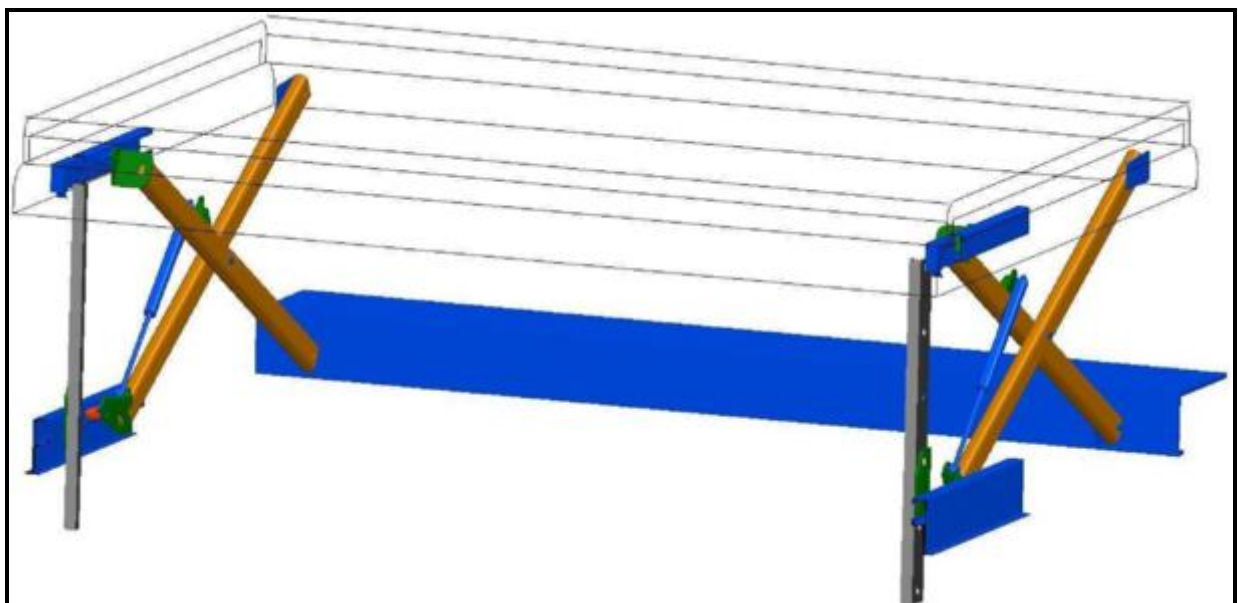

-Notice the flush roof & XTOP

Exploded view of retracted XTOP –Notice that only a minimum of space is used

Exploded view of extracted XTOP –Here shown with safetybar in highest position

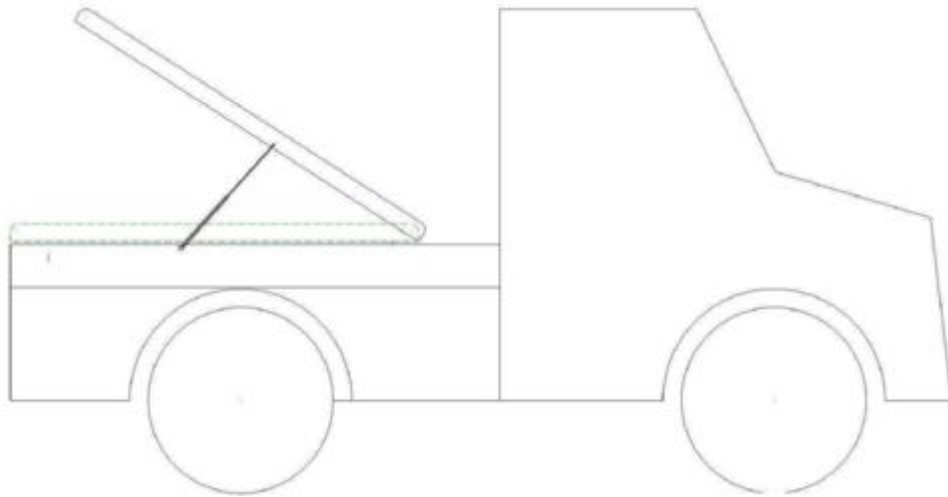

Safetybar installed in a lower position –allowing XTOP to carry taller loads on top

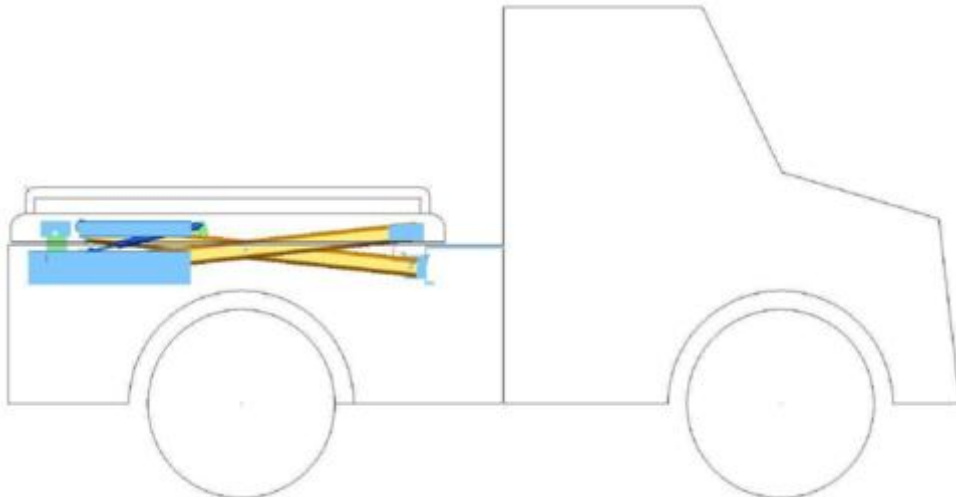

All materials are carefully selected to withstand heavy-duty operation

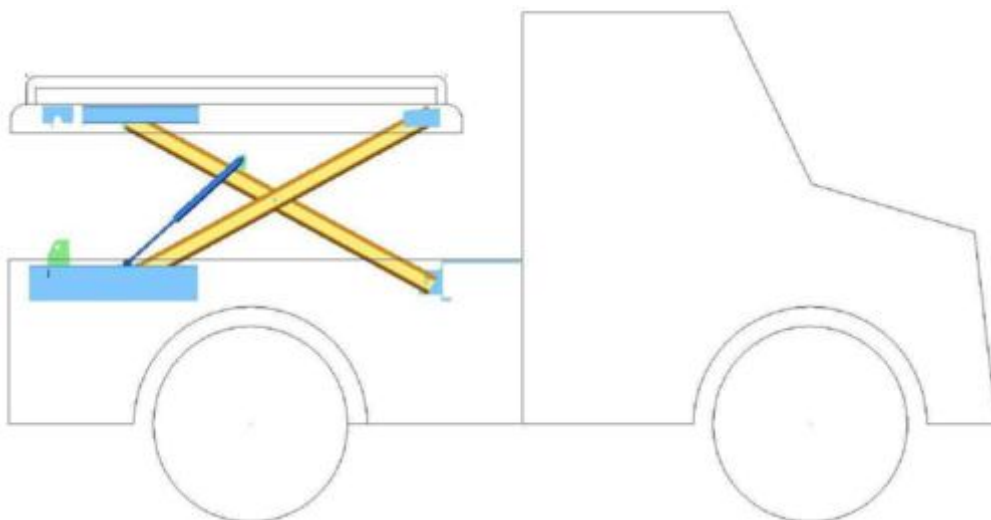

6 different positions allows to carry loads with various heights

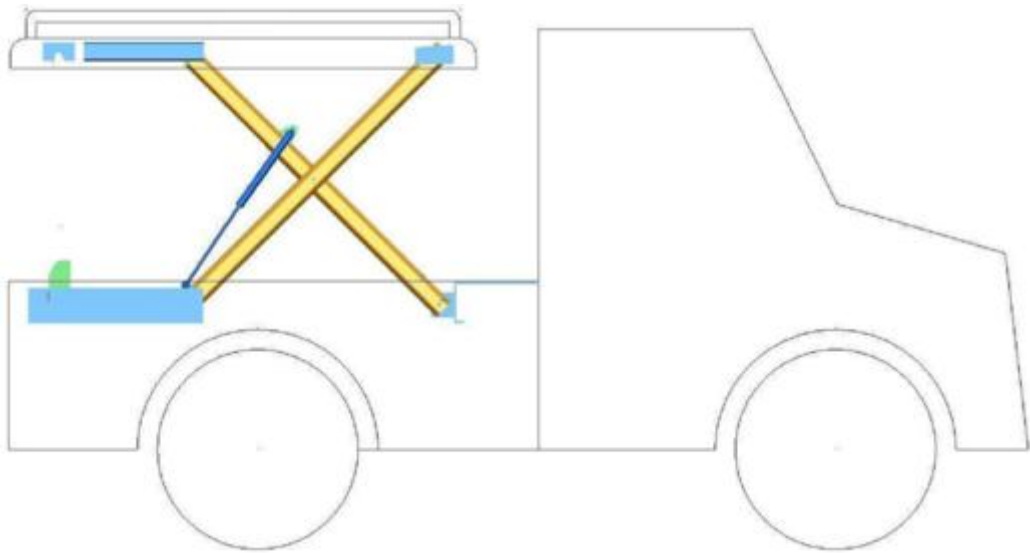

Traditionally tonneau covers / tops have limited access and storage capabilities

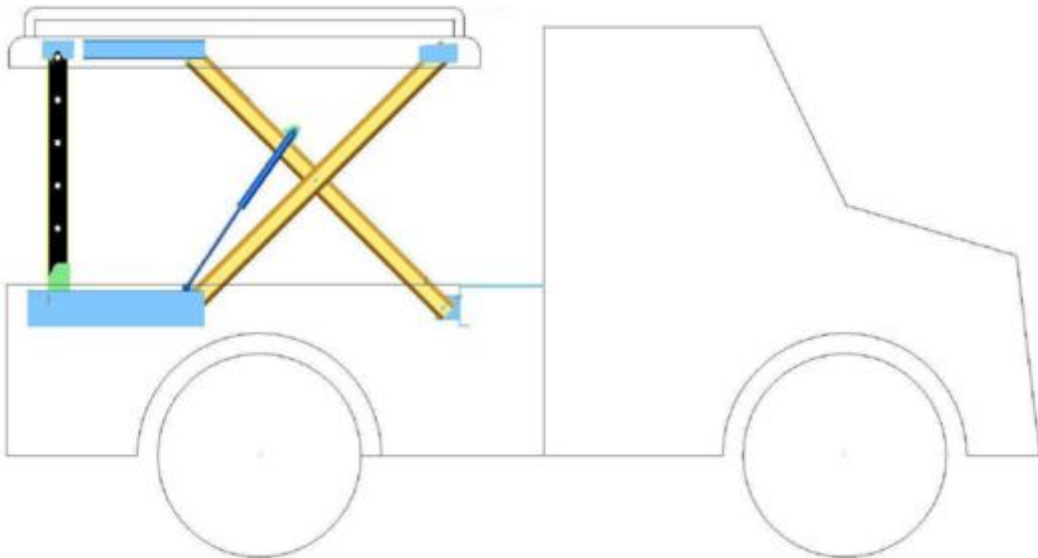

XTOP let's you carry loads both under and on the roof

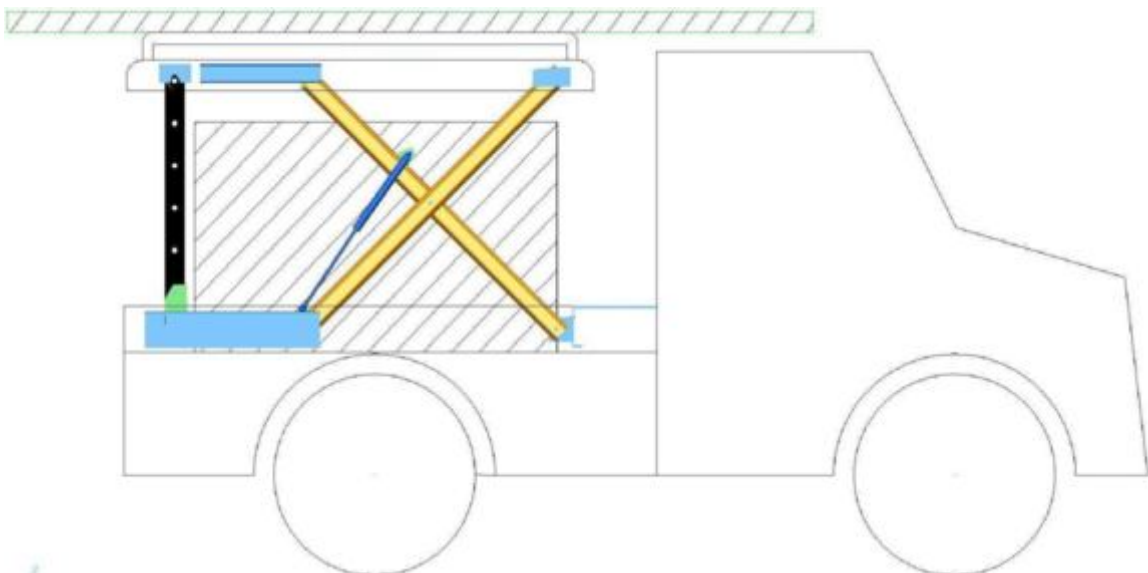

XTOP opens up vertically and therefore has easy access

XTOP is flush with the roofline

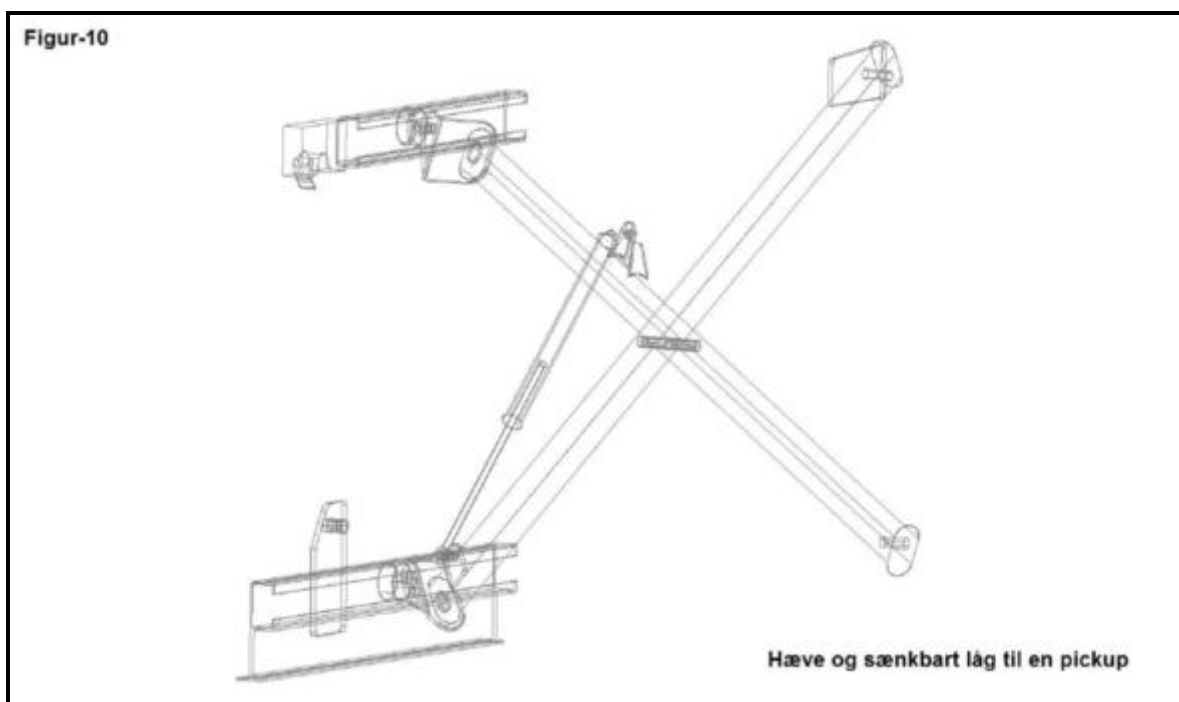

With the adjustable rear safetybar you can carry loads in 5 additional heights

Shown here (in highest position) is cargo both on top and below XTOP

We feel that both quality, design and functionality is unsurpassed and are proud to offer the XTOP starting late summer 2008

XTOP

and all of it's components are Pat. Pending & Reg. Design.
